### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

In a cap for mounting on an aerosol container, the cap including a tubular body having a lower part for engaging with the container, an aperture, and a lid for closing the aperture, the lid formed as a folding plate and connected to the aperture through a bendable line and a break line, the lid having an engagement device engaging with a stopper for keeping the folding plate in a second position, the inclusion in combination with the aforementioned of a top plate member having the aperture and having a periphery connected to an upper end portion the tubular body member so as to close a top surface of the tubular body member was not found or fairly suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Response to Arguments***

2. Applicant's arguments, filed November 2, 2004 (see remarks pages 4-5), with respect to the top plate member have been fully considered and are persuasive. Upon review of applicants' disclosure, the Emerson et al. reference, and careful consideration of applicants' arguments presented during the personal interview of November 16, 2004, as well as the remarks section of the November 2, 2004 response, the Emerson et al. reference can not be fairly characterized as including a top plate member having the aperture and having a periphery connected to an upper

end portion the tubular body member so as to close a top surface of the tubular body member.

The rejection of claim 1 has consequently been withdrawn.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth Bomberg whose telephone number is 571-272-4922.
